Education

University of Houston

Bachelor of Science in Computer Science, Minor in Mathematics,

August 2021 – May 2025

Houston, TX | GPA: 3.63

Technical Skills

Languages: Python, TypeScript, JavaScript, C++, SQL, HTML, CSS, Swift

Frameworks and Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Pandas

Cloud and DevOps: Azure, Firebase, Docker, GitLab CI/CD, Linux, Postman

AI and Automation: Python automation, workflow tooling, data indexing, SQL optimization

Tools and Platform: Git, GitLab, Jira, Splunk, Jupyter Notebook

Relevant Coursework/Skills: Agile Methodologies, OOP, Data Structures and Algorithms, Database, Data Science, Software Design, Technical Communication

Experience

Paycom

June 2025 – Present

Software Developer

Dallas, TX

- Built client dashboards using **PHP**, **TypeScript**, **React**, and **MySQL**, improving workflows for **37,500+** clients.
- Optimized SQL queries and database performance to generate reports **30%** faster across frontend and backend systems
- Created an automated dashboard to catch unmapped deductions, cutting support tickets by **25%**.
- Strengthened security by fixing vulnerabilities and reducing system risks by **20%**.
- Collaborated in **Agile** development environment, managing tasks in **Jira** and supporting **CI/CD** pipelines using **GitLab**, **Docker**, and **Splunk**, maintaining **99%** uptime.

NASA/Boeing

May 2024 – May 2025

Software Engineer Intern

Houston, TX

- Automated network config tasks (e.g., VLAN switching, port toggling) using **Python/PyQt**, reducing manual effort by **80%** and supporting **DevOps automation** practices.
- Designed a **SQLite**-based IP lookup tool, improving data access speed by **40%**.
- Collaborated with NASA and Boeing engineers to gather requirements, design UI features, and deliver scalable automation solutions.

University of Houston

January 2024 – May 2025

Teaching Assistant

Houston, TX

- Led labs and office hours for **120** students, improving completion rates by **25%** in **C++** coursework.
- Mentored students on **debugging** and logic, reducing assignment errors by **20%** through personalized programming support.

Projects

MyBeli | *TypeScript, Next.js, React.js, Tailwind CSS, Git*

June 2025

- Developed a **food tracker** with dynamic pages and responsive UI using **Next.js** and **Tailwind CSS**.
- Implemented routing with Next.js App Router and prepared for **Firebase** integration.

PiggyPal | *Swift, Firebase, Git*

December 2024

- Built a **Swift budgeting app** using 50/30/20 rule to manage expenses via a clean UI.
- Integrated **Firebase** to store transactions and visualize reports with chart-based summaries.

Museuma | *JavaScript, Azure, React.js, Node.js, MySQL, Tailwind CSS, Postman, Git*

May 2024

- Built a fullstack application for museum record management using **React**, **Node.js**, and **MySQL**, with focus on **RESTful API** integration.
- Designed and tested a structured **MySQL** database and verified **API** routes using **Postman** to ensure complete **CRUD** functionality.
- Linked a React frontend to a **Node.js backend** for full CRUD operations.

Leadership

Computer Science Girls

May 2024 – Present

President

Houston, TX

- Oversaw a team of **10** officers to coordinate events and initiatives, supporting over **133** students each semester.
- Secured **7** corporate partnerships, enabling **5+** professional workshops and increasing student participation by **35%**.
- Presented to sponsors, university partners, and large student groups while building comfort with client-style communication, leadership, and stakeholder management.
